

# CAGE MATCH!

## THE MMA FIGHT GAME

*Cage Match is the tabletop game of head-to-head, mixed martial arts combat.*

The object of the game is to defeat your opponent, either by knockout (depleting either his head or body), or by submission, taking him down to the mat, passing his guard and successfully applying a submission move.

Play with fighters of varying backgrounds, from boxing to free-style wrestling to Brazilian Jiu-Jitsu.

Cage Match uses the patented (pending) Head2Head Duels system of simultaneous secret action selection. Just like a real fight, there is no "my turn, your turn." You can do any move, any time, as long as you can pay its focus cost. Much like rock-paper-scissors, every move in Cage Match has a counter, and there is still a roll of the dice!
